Dr. Vinay Saharabudde explained the I Care mobile application which is developed to tackle the current COVID crisis. There are many people who need food, counselling, shelter along with other essentials and on the other hand there are people willing to donate these for the needy. So, the purpose of the app is to connect them and uplift the society. There are many Doctors and Psychologists who help the people and advise them and try to help them financially and mentally as well. India has substantial goodwill in the world and this goodwill is seen through the app.
